Our Technical Assistance Program started in 2011, with the objective to develop National Federations categories I-II, by sending experienced and current instructors to offer support to the National Federation by developing an organization program focused on the Coaches, Physical Education Teachers, volleyball academies, clubs and administrators and managers.

The pioneers of the Development Program are Mr. Justo Morales from Cuba, who started in AFECAVOL and Mr. Juan Cartagena continuing in the Caribbean zones of CAZOVA and ECVA; later Mr. Joao Café, from Brazil, Mr. Reed Sunahara from Hawaii and Xavier Perales from Argentina joined the program.

This program has as its main objective to create training processes to improve the level of national coaches, training plans, and to create relationships within the National Federation, and others sports teams both male and female at all levels.
