**MARCO TULIO GOMES**  
PANAMERICAN UNION PRESIDENT AND BEACH VOLLEYBALL  
TECHNICAL SUPERVISOR AT JUNIOR PAN-AMERICAN GAMES

Development means competition, not only training, that's why these Games are of great importance. The organization allows several countries to compete in this age-group under the structure of a senior competition, with all the protocols is an important experience for our athlete's development, not only from

NORCECA but also from the South American Confederation as well.

I am impressed by Cali's courage to organize an event of such magnitude and they've managed them to be really good, of course being the first edition there are things to improve, but our role as technical supervisors is to help in the beginning, I hope this initiative will continue. I believe the goals were accomplished and that the Games are here to stay every four years.

The competition level was really good, for example, Brazil sent their number one ranked players, they had their first international experience in Cali and they will continue to prepare for Santiago, there is no doubt of Panam Sports success, along with NORCECA and Voley Sur we showed the importance for multi-sports events
